Faculty of Homeopathy
PRIMARY HEALTH CARE EXAMINATION

SECTION 1

1. The examination
The Primary Health Care Examination is a preliminary examination for statutorily registered healthcare professionals that entitles successful candidates to become Licenced Associates (LFHom) of the Faculty of Homeopathy.

The Primary Health Care Examination is accredited by the Faculty of Homeopathy. Through its Academic Board, the Faculty of Homeopathy monitors the standard of the examination and curriculum. The Academic Board includes representatives of all UK based Faculty-accredited teaching centres – Bristol, Glasgow and London.

The examination paper consists of 100 multiple choice questions. The duration of the examination is a maximum of two hours although many people finish the exam in less than the allotted time.

2. Entry criteria
The PHCE is open to healthcare professionals who hold a qualification that is registrable in the UK, or hold a qualification registrable in an EU country where they practice. When you apply to sit the examination, it is your responsibility to supply the Faculty with details of your professional registration.

3. LFHom qualification
If you pass the PHCE, you may apply to be become a Licenced Associate of the Faculty of Homeopathy. Once your application has been accepted, you may use the letters LFHom followed by a suffix denoting your profession e.g. LFHom(Dent); LFHom(DentHyg); LFHom(DentTher); etc.

The examination paper is adapted to meet the needs of specific groups of healthcare professionals. There are papers for dentists, doctors, nurses, midwives (who take the same paper as nurses), pharmacists, podiatrists and veterinary surgeons. The qualification LFHom is awarded to overseas candidates provided that their qualification is registrable within the UK.

If you become a Licenced Associate, your continued use of the qualification LFHom depends on your fulfilling these two requirements:

i) you do not allow your Faculty membership to lapse.

ii) you fulfil the Faculty’s Continuing Professional Development requirement. For LFHoms, currently, this is a minimum of 12 hours per year attendance based activity and self-directed study, averaged over three years. Further details will be supplied to you once you become a Licenced Associate member.
4. Aims and scope of the PHCE
As interest in and demand for homeopathy grows, it is important that healthcare professionals are able to give informed guidance to patients and clients. If you pass the examination, you will have knowledge and understanding of:

i. what homeopathy is
ii. what it can achieve
iii. what its limits are
iv. how it integrates with contemporary health care
v. when a patient would benefit from referral to a specialist
vi. how to act supportively while a patient is under specialist care
vii. how to use homeopathy in a specified number of targeted clinical situations integrated with normal professional practice in day-to-day patient care.

Attendance at a foundation course accredited by the Faculty involves receiving a minimum of 30 hours of teaching. In addition you will normally need a further 120 hours of private study.

Success in the examination denotes a basic level of competence which will enable you to augment your existing professional skills through the practice of sound, basic homeopathy. It does not equip you to analyse and treat chronic or complex cases other than by the circumscribed use of the particular targeted applications defined in the curriculum. Neither will you be able to take referrals from other colleagues. At all times you are expected to practise within the scope and limits of responsibility of your normal professional practice. These limits are fully described in the syllabus on pages 7 to 25.

5. Faculty–accredited training
The examination is based upon the syllabus studied in the Faculty-accredited foundation course. You may apply to sit the PHCE without having undertaken Faculty-accredited training, although it is strongly recommended that you complete the foundation course to avoid the risk of failure in the examination.

6. Results
After the examination, the Faculty of Homeopathy will let you know (i) whether you have passed or failed and (ii) your mark. Results are sent by email within approximately one month of the examination. Results cannot be given out by telephone.

If you wish to appeal against your result you must write to the: Education & Quality Officer, Faculty of Homeopathy, CAN Mezzanine Building, 49-51 East Rd, London, N1 6AH or email education@facultyofhomeopathy.org within one month of receipt of your marks.

7. Regulation of standards and safety
If you become a Licenced Associate (LFHom), the Faculty will ensure safety and quality of clinical care by requiring that you adhere to certain professional standards and remain within the normally recognised limits of practice and competence of your professional discipline. You are also bound to practise within the limits of your homeopathic competence at LFHom level.

If you breach the above, the Faculty may implement its disciplinary procedures which may include those of your professional regulatory body. The Faculty may withdraw your Licenced Associateship.
8. Further study
LFHom level training is limited to familiarisation with homeopathy and targeted clinical competence. For those who wish to move towards the goal of more advanced clinical practice, this level of qualification can be used as the first step in on-going training. Dentists may study towards the membership examination and if successful use the qualification MFHom(Dent). Further training is not available for Dental Hygienists or Dental Therapists. If you would like further information please contact the Faculty of Homeopathy at the email address on page 6.

9. Practical details
Administration is undertaken by the Faculty and queries, application forms and fees should be directed to the Faculty Education & Quality Officer at education@facultyofhomeopathy.org or at the address on page 6. Application forms must be submitted by the published closing date.

The examinations are held at Faculty-accredited teaching centres and by Faculty-accredited course providers in Belfast, Bristol, Glasgow, London and locations overseas. Examination sittings and closing dates for applications are listed in the Faculty examinations calendar which can be viewed on the Faculty website or in the Faculty magazine Simile.

Overseas students
Candidates whose native language is not English may use a foreign language dictionary. Dictionaries will be scrutinised by the invigilator before the exam.

Withdrawals
Notice of withdrawal from the examination must be given by email to the Education & Quality Officer at education@facultyofhomeopathy.org or in writing to the address on page 6. The examination fee less a 50% administrative charge will be refunded when notice of withdrawal is received up to 30 days before the examination is due to take place. No other refunds will normally be made. The Faculty will consider a full refund for withdrawals due to illness or will transfer an application to a later sitting.

Transfers
Candidates may transfer their application to a future sitting provided that they notify the Faculty in writing / by email before the published closing date for return of applications. A 10% administrative fee will be charged. Candidates may not transfer their application more than once unless they have obtained special approval from the Education & Quality Officer.

Re-sitting the examination
Candidates who fail the PHCE may re-sit the examination during the following exam season - for example a candidate who fails the examination in the spring may re-sit it during the autumn. Candidates cannot apply to re-sit the examination at another centre during the same season. Candidates are also limited to no more than three attempts at the examination, unless they can give good reasons for further attempts and are supported by their teaching centre. Please note that if the examination is cancelled for reasons beyond the Faculty’s control, candidates will be allowed to take the exam at the next available sitting. Candidates who re-sit the examination pay a reduced examination fee.

Membership
The first year of membership is included in the examination fee; thereafter a separate fee is payable to the Faculty for this and must be paid annually to maintain LFHom status.
Faculty contact details
Faculty of Homeopathy, CAN Mezzanine, 49-51 East Road, London, N1 6AH.
Tel: 020 3640 5903 Email: education@facultyofhomeopathy.org
Website: www.facultyofhomeopathy.org
SECTION 2

A. Syllabus outline

BASIC PRINCIPLES

A basic understanding of historical and contemporary development, concepts and evidence including:

- Auto-regulation, hormesis, similars and minimum dose.
- Sensitivity in the ill person, individualisation, totality of symptoms.
- Materia medica sources: toxicology, provings, clinical.
- Outline of the theory of chronic disease and miasms.
- Scientific evidence: clinical data, trials and meta-analyses, laboratory experiments.
- Integration / relationship to other forms of care including conventional medicine and herbalism.
- Self-healing and placebo responses.

PHARMACY

Sources and preparations including:

- Mother tincture, triturations, succussion, serial dilutions
- Dilutional scales: X (D), C, LM
- Low & high potencies
- Hahnemannian & Korsakovian methods
- Biophysical models
- Prescription writing

CONSULTATION & CLINICAL SKILLS

A basic understanding of the consultation, history taking and case analysis in homeopathic care:

Perspectives of the illness:

- Presenting problem
- Aetiology
- Diagnosis & pathology
- Patients' disease reactions: the clinical picture
- Constitutional / fundamental reactions
- Constitution
- Biographical & past history including family history
- Typology & drug types
- Basic understanding of the concept of layers
- Concepts of acute and chronic case management
History taking and analysis:

- Understanding and categorising symptoms and their modalities
- Keynotes, totality, essence, strange rare and peculiar reactions
- Hierarchy of symptoms
- The repertories: their development and content, and their role in case analysis

THERAPEUTICS AND CASE MANAGEMENT

A basic understanding in the following topics:

- Clinical applications of low & high potencies
- Speed of responses
- Repetition of the dose
- Changing dosage
- Changing remedy
- Schools of practice including Classical, Pluralistic, Complex and proprietary mixtures
- Clinical reaction patterns
- Acute, chronic and incurable cases
- Initial reactions - aggravations
- Direction of cure (Hering’s law)
- Suppression
- Isopathy and tautopathy
- An introduction to nosodes

GENERAL CLINICAL APPLICATIONS

Materia medica as listed, in the context of, the specified clinical conditions, modified by the boundaries of each professional discipline

Legal and ethical aspects of homeopathic prescribing within the context of different healthcare professions, including non-medical practice.

DENTAL APPLICATIONS

Targeted applications:

- Common core applications - acute anticipatory anxiety
- Dental applications

Clinical conditions amenable to treatment by practitioners at the introductory level:

- Acute dental fear both in adults and children
- Post-operative pain; post extraction/trauma
- Haemorrhage
- Toothache
- Pericoronitis
- Teething
- Dental abcess
- Dry socket
B. PHCE medicines syllabus

Learning objectives and outcomes

1. TARGETED CLINICAL APPLICATIONS
Students will acquire the materia medica knowledge necessary to enable effective prescribing of a limited range of homeopathic medicines giving reliable results in a limited number of specified clinical applications in Primary Care.

OUTCOME: Students will be able to apply their materia medica knowledge to prescribe the named medicine effectively in given clinical conditions.

2. KEY CHARACTERISTICS
Students will be able to recognise the key characteristics indicating named medicines in specific clinical conditions.

OUTCOME: Students will know the essential outline of the clinical picture on which a prescription for the named medicine in the specified clinical conditions will be based.

Students will be able to differentiate between named medicines indicated for the same specified clinical condition. Students will understand the significance of detailed symptomatology in making the differentiation of the homeopathic prescription in individual patients.

OUTCOME: Students will be able to identify the key individualising characteristics of the named medicines.

3. DIFFERENTIATION OF MEDICINES
Students will be able to differentiate between the indications for the use of a number of named medicines in specified clinical conditions.

OUTCOME: Students will be able to differentiate between the symptom pictures of the named medicines in the specified clinical conditions. Minimal symptom picture only required of secondary medicines, shown in brackets.
C. Primary Medicines A-Z

Materia medica listed by medicine name
(Medicines for comparison and differentiation are shown in relation to each targeted clinical application)

| ACONITE |
| --- | --- | --- |
| **Targeted applications** | **Differentiation** | **See also** |
| CROUP |  |  |
| URT; CORYZA | Allium, Ars alb |  |
| SHOCK | Arn |  |
| ANTICIPATORY ANXIETY [PANIC, FEAR] | Arg nit; Ars Alb; Gels |  |
| FEVER | Bell; Ferrum phos |  |

**Key characteristics**
Acute conditions. Sudden or violent onset. Intense fear (death)
Restlessness, excitement, agitation
Ailments from shock, fright, fear
Fever. Thirst
Ailments from exposure to cold, dry wind
Modalities: < violent emotions, cold dry wind, night, especially around midnight; > open air

| APIS MELLIFICA |
| --- | --- | --- |
| **Targeted applications** | **Differentiation** | **See also** |
| ACUTE MUSCULOSKELETAL CONDITIONS | Bryonia; Puls; Rhus tox |  |
| CONJUNCTIVITIS | Arg nit; Euphr; Puls |  |
| ACUTE ALLERGIC REACTION |  |  |

**Key characteristics**
Swelling/oedema/heat
Hot, red, swollen, shiny, acutely painful skin / joint(s)
Red, swollen painful conjunctiva and/or lids
Oedema of face and/or eyes
Photophobia
Swelling eruptions and reactions to bites and stings
Stinging and burning pains
Acute dysuria, frequency, painful urging
Thirstless (in acute state)
Modalities: < heat, touch, pressure, afternoon; > cool air, cold applications
**ARGENTUM NITRICUM**

**Key characteristics**

Lazy, selfish, philosophical, opinionated, untidy, hoarding

Redness of orifices. Hot feet - has to stick them out of bed

Faint sinking feeling (in abdomen) about 11am

Eruptions: itchy (< scratching, washing, at night), hot, red, excoriated

Conjunctivitis, blepharitis and styes: burning, itching, hot, red

Diarrhoea - driving out of bed in the morning, eructations like bad eggs

**Modalities:** < 11 am, bathing, becoming overheated, overexertion, standing, milk, > dry, warm weather, open air, motion

**Food:** Desires fat, sweets, highly seasoned food, alcohol; hungry at 11am. < milk.
### D. Secondary target medicines A-Z

For ‘usefulness’ in targeted clinical applications only

<table>
<thead>
<tr>
<th>MEDICINE</th>
<th>APPLICATION</th>
<th>KEYNOTES - FOR DIFFERENTIAL DIAGNOSIS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ALLIUM CEPA</strong></td>
<td>Coryza, Hay fever</td>
<td>URT and conjunctiva: Watering eyes; excreting watery nasal discharge; sneezing; rasping, spasmodic cough Modalities: &lt; evening, warm room; &gt; open air, cold room</td>
</tr>
<tr>
<td><strong>CANTHARIS</strong></td>
<td>Insect bites (inflamed), burns</td>
<td>Burning vesicular eruption</td>
</tr>
<tr>
<td><strong>CARBO VEG</strong></td>
<td>Collapse, fainting, weakness Indigestion, eructations</td>
<td>&gt; cool air; being fanned &lt; rich food</td>
</tr>
<tr>
<td><strong>COCCULUS INDICUS</strong></td>
<td>Nausea and vomiting</td>
<td>Nausea with vertigo &lt; lack of sleep</td>
</tr>
<tr>
<td><strong>COLOCYNTH</strong></td>
<td>Colic</td>
<td>Cramping pain - &gt; pressure, doubling up, warmth Diarrhoea: watery, &lt; after eating/drinking (Ailments from) Anger</td>
</tr>
<tr>
<td><strong>CUPRUM METALLICUM</strong></td>
<td>Cramp, night</td>
<td>Cramp in the calves and feet at night</td>
</tr>
<tr>
<td><strong>EUPHRASIA</strong></td>
<td>Conjunctivitis, hayfever, coryza</td>
<td>Acrid tears, bland nasal discharge itching eyes, photophobia Modalities: &lt; evening, indoors, warmth, light; &gt; open air, dark</td>
</tr>
<tr>
<td><strong>FERRUM PHOSPHORICUM</strong></td>
<td>Fever (cf Belladonna) Acute otitis media (cf Chamomilla, Pulsatilla) Bleeding (cf Phosphorus)</td>
<td>Early stages of febrile illness &amp; inflammation Slow onset. Full, soft, flowing pulse. Flush/pallor Dull red ear drum Thirsty, sweaty, shivery Modalities: &lt; exertion, open air, jarring; &gt; gentle motion</td>
</tr>
<tr>
<td><strong>GRAPHITES</strong></td>
<td>Eczema Skin cracks</td>
<td>Eruptions oozing yellow sticky exudate Hard rough skin Cracks behind ears, canthi, corners of mouth, hands &lt; chilly, cold</td>
</tr>
<tr>
<td><strong>HEPAR SULPHURIS CALCAREUM</strong></td>
<td>Septic states: abscess, otitis, pharyngitis</td>
<td>Sudden, intense, foul discharge, offensive sweat, chilly, extremely irritable, oversensitive, thirsty. Helps abscess to mature/discharge. Sensitive to drafts</td>
</tr>
<tr>
<td><strong>HYPERICUM PERFORATUM</strong></td>
<td>Injury, crush or puncture wounds</td>
<td>Damage to sensitive/nerve-rich tissues; penetrating wounds; spinal injuries. Centripetal spread of pain</td>
</tr>
<tr>
<td><strong>IPECAC</strong></td>
<td>Cough causing vomiting, Nausea &amp; vomiting, hyperemesis gravidarum</td>
<td>Cough: wheezy, spasmodic, causing vomiting, &lt; movement. Nausea, constant; vomiting (doesn’t relieve) – nothing ameliorates, clean tongue &lt; smell of food, movement; salivation</td>
</tr>
<tr>
<td><strong>ISOPATHIC MEDICINES - HOUSE DUST MITE - MIXED POLLENS AND GRASSES</strong></td>
<td>Homeopathic immunotherapy</td>
<td></td>
</tr>
<tr>
<td><strong>KALI BICHROMICUM</strong></td>
<td>Acute catarrh</td>
<td>Sticky, stringy catarrh; maxillary sinus pain, root of nose</td>
</tr>
<tr>
<td><strong>LEDUM PALUSTRE</strong></td>
<td>Injury; puncture wounds; eye injury; insect bites, stings Acute musculoskeletal conditions</td>
<td>Painful joints, &gt; cold, pale; ascending progression. Chilly patient, symptoms &gt; cold</td>
</tr>
<tr>
<td><strong>MERCURIUS SOLUBILIS</strong></td>
<td>Mouth ulcers Pharyngitis, tonsillitis Influenza Teething: sweaty, salivation ++</td>
<td>Fever: sweat ++, offensive, &lt; heat and cold, tongue swollen and indented, metallic taste. Offensive sweat, breath, discharges. Modalities: &lt; night, sweating, lying on right side, when heated, drafts, damp cold; &gt; moderate temperature, rest</td>
</tr>
<tr>
<td><strong>RUTA GRAVEOLENS</strong></td>
<td>Injury/strain: tendon, periosteum, joint</td>
<td>Temp and weather modalities as Rhus tox</td>
</tr>
<tr>
<td><strong>SABADILLA</strong></td>
<td>Hay fever</td>
<td>Profuse watery nasal discharge and sneezing; &lt; cold room, cold drinks; &gt; warm room, warm food and drink</td>
</tr>
<tr>
<td><strong>SYMPHYTUM OFFICINALE</strong></td>
<td>Fractures; injury to bone, periosteum. Injury to eye and orbit</td>
<td>Pain from bony metastases in cancer</td>
</tr>
</tbody>
</table>
E. Dental specific materia medica

Below is a listing in alphabetical order of the materia medica for the PHCE specifically for dentists. Many of the medicines are in the core listing on the previous pages and are mentioned here with reference to the specific dental applications of each medicine. There are a few medicines which are only covered in dental teaching, and those have (dental only) after them.

### ACONITE

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACUTE DENTAL PHOBIA AND SHOCK</td>
<td>Phosphorus</td>
<td>Stramonium</td>
</tr>
</tbody>
</table>

**Key Characteristics**
Suddenness, anxiety, great thirst. Bitter taste, restless, pale

**Modalities:** Worse from heat, dry cold air

### APIS MELLIFICA

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>OEDEMA OF SKIN MUCOUS MEMBRANE, INTRA ORAL SWELLINGS WITH CELLULITIS, HERPETIC LESIONS</td>
<td>Lachesis</td>
<td>Cantharis</td>
</tr>
</tbody>
</table>

**Key Characteristics**
Swollen, redness oedema, inflammation, stinging effusion intolerant of heat or touch. Swelling and puffiness

**Modalities:** <heat, touch pressure, right side, >open air, cold bathing

### ARGENTUM NITRICUM

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>DENTAL FEARS AND PHOBIA</td>
<td>Pulsatilla, Phosphorus, Sulphur</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**
Restless, hot, anxious

**Modalities:** > for open air, sips water

### ARNICA MONTANA

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRAUMA: PRE &amp; POST-OP; DENTAL; OVER-EXERTION (CRAMP); BLEEDING</td>
<td>Hypericum</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**
Bruising, soft tissue damage; capillary bleeding; soreness, stiffness

Mental state: denies problem, resents interference cf Bryonia; Aetiology
### BELLADONNA

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOOTHACHE, TEETHING, DRY SOCKET</td>
<td>Aconite, Bryonia, Apis, Lachesis</td>
<td></td>
</tr>
</tbody>
</table>

Key Characteristics
- Sinus pain, throbbing pain, pulsing, rapid onset
- Right sided. Worse for jarring, intense heat

Modalities: Craves lemonade

### CALENDULA OFFICINALIS (DENTAL ONLY)

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOFT TISSUE HEALING, PROMOTES GRANULATION BY FIRST INTENTION</td>
<td>Arnica, Symphytum</td>
<td>Hammamelis, Hypericum</td>
</tr>
</tbody>
</table>

Key Characteristics
- Open wounds, slow-healing pain is excessive in relation to injury
- Coldness, great sensitivity to cold

### CHAMOMILLA

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>TEETHING</td>
<td>Aconite, Cheiranthus</td>
<td>Cina</td>
</tr>
</tbody>
</table>

Key Characteristics
- Irritable, inconsolable
- Abnormally sensitive to pain. Cheek red and white

### CHEIRANTHUS (DENTAL ONLY)

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>PERICORONITIS</td>
<td>Hepar sulphate, Silicea</td>
<td></td>
</tr>
</tbody>
</table>

Key Characteristics
- Marked trismus as main symptom

### CHINA OFFICINALIS (DENTAL ONLY)

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>TEETHING, HAEMORRHAGE, FEVERS, GASTRO INTESTINAL</td>
<td>Lycopodium, Natrum muriaticum, Nux vomica</td>
<td></td>
</tr>
</tbody>
</table>

Key Characteristics
- Complaints after loss of body fluids (haemorrhage, diarrhoea), irritable, introverted and intense
- Periodicity of problems, fears of animals

Modalities: < touch, > hard pressure, food tastes bitter
### COFFEA (DENTAL ONLY)

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>NEURALGIA, TOOTHACHE, BRUXISM</td>
<td>Natrum muriaticum, Nux vomica, Staphysagria</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**
Over excitement, sensitive, over reactive, excitement of the mind

**Modalities:** < Excessive emotions, noise odours; > Warmth, holding cold water in the mouth, < coffee

### GELSEMIUM SEMPERVIRENS

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>DENTAL PHOBIA</td>
<td>Aconite, Argentum nitricum, Arsenicum album, Ledum</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**
Timid, stage fright, tremble
Thirstless

**Modalities:** < anticipation, weakness

### HEPAR SULPHURIS CALCAREUM

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABCESS, SUPPURATIVE PROCESSES, INFECTION, OTITIS, PHARYNGITIS</td>
<td>Arsenicum, Calc Carb, Silica</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**
Over sensitivity to all external stimuli, anxiety, irritable, chilly, intolerance to cold, offensive odours, craves fat
Stitching splinter like pains, abscess formation and suppuration with intense sensitivity to pain

**Modalities:** < cold air wind, < uncovering

### HYPERICUM PERFORATUM

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>NERVE PAIN, CONTUSIONS, LACERATIONS</td>
<td>Arnica, Ledum, Staphysagria</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**
Sharp shooting pains
Puncture wounds in areas rich in nerves, lacerations < movement

### LEDUM PALUSTRE

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUNCTURE WOUNDS</td>
<td>Apis, Arnica, Hypericum</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**
Cold feeling in wound. Chilly

**Modalities:** Better for cold applications. Worse for warmth
### MERCURIUS SOLUBILIS

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>PERIODONTITIS, ORAL INFECTION, CANDIDAL INFECTION, TEETHING, APHTHOUS ULCERATION</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Key Characteristics
Teething: sweaty, salivation ++

### MYRISTICA (DENTAL ONLY)

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABSCESS, SUPPURATIVE PROCESSES</td>
<td>Hep sulph, Silica</td>
<td>Calc sulph</td>
</tr>
</tbody>
</table>

Key Characteristics
Hastens suppuration shortens duration. "Homeopathic scalpel"

### PHOSPHORUS

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANXIETY, PHOBIA, HAEMORRHAGE, PERIODONTAL DISEASE</td>
<td>Aconite, China, Ledum</td>
<td></td>
</tr>
</tbody>
</table>

Key Characteristics
Open bright excitable patients
Modalities: Better cold drink, thirsty, better for sleep. Collapse states

### RHUS TOXICODENDRON

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>HERPES SIMPLEX, TMJ DYSFUNCTION</td>
<td>Bryonia, Nat muriaticum</td>
<td></td>
</tr>
</tbody>
</table>

Key Characteristics
Restlessness
Modalities: Better for heat, slight motion. Worse damp weather, morning

### RUTA GRAVEOLENS

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRY SOCKET, PERIOSTEAL AND PERIODONTAL DAMAGE FROM TRAUMA</td>
<td>Arnica, Rhus tox</td>
<td></td>
</tr>
</tbody>
</table>

Key Characteristics
Aching pains with stiffness
Modalities: Worse for cold, damp weather
### SILICEA

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABSCESS, SUPPURATION, SPLINTERS AND FOREIGN BODIES, STYES, EMOTIONAL AILMENTS, PERIODONTAL AND PERIAPICAL INFECTION</td>
<td>Calc, Hepar sulph</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**

Anxious, timid; but can be resolute; refined, sensitive to all impressions; conscientious
Recurrent ENT/URT conditions; lymphadenopathy.
Suppuration: aids resolution. Constipation. Anal fissure
Child small for age. Sweats; foot sweat gout. Chilly but sweaty
Ailments from anger, grief and disappointed love, 'mortification' and humiliation, anger, suppressed anger/indignation
**Modalities:** Worse for cold, suppressed sweat, drafts.
**Food:** Adverse to fats

### SYMPHYTUM OFFICINALE

<table>
<thead>
<tr>
<th>Targeted clinical applications</th>
<th>Differentiation</th>
<th>See also</th>
</tr>
</thead>
<tbody>
<tr>
<td>NON-UNION OF FRACTURES, ACTION ON THE PERIOSTIUM</td>
<td>Arnica, Calc carb, Phosphorus</td>
<td></td>
</tr>
</tbody>
</table>

**Key Characteristics**

Slow healing of fractures, prickling pains in the periostium
Damage to bone after fracture
1. The sensation of a lump in the throat (globus hystericus) is a feature of which of the following medicines?
   a) Carbo vegetabilis
   b) Ignatia
   c) Natrum muriaticum
   d) Phosphorus

2. Which of the following statements is FALSE?
   a) Nosodes are very deep acting medicines
   b) Nosodes can be prone to cause aggravations
   c) Nosodes provide good prophylaxis as travel immunisations
   d) Nosodes should not be repeated frequently

3. Hierarchy of symptoms means:
   a) The more symptoms of a particular type you have, the more important they are
   b) Every case must have symptoms at all levels before you can prescribe accurately
   c) Symptoms are related to the central nervous system
   d) Symptoms are evaluated according to a set order of importance

4. Which of the following groups best represents the picture of Sepia?
   a) Hyperactive and playful
   b) Friendly and submissive
   c) Tired but stimulated by activity
   d) Aggressive and dangerous

5. Which of the following is a typical feature of Arsenicum album?
   a) Restlessness
   b) Aggravation by warm applications
   c) Midday aggravation
   d) Profuse salivation

6. In waiting room fear, which one of the following is best indicated?
   a) Gelsemium
   b) Ignatia
   c) Lachesis
   d) Nux vomica

7. Which of the following is best indicated as a first prescription in a case of acute pointing dental abscess?
   a) Hepar sulphuris
   b) Myristica
   c) Chamomilla
   d) Silicea
G. Further information

If you have a general enquiry, or would like to know more about:

- your Faculty membership
- how to apply for the exam

please contact the Education & Quality Officer at the email address on page 6.

The exam calendar, details of accredited teaching centres and course providers and more information about the Faculty can also be found on our website www.facultyofhomeopathy.org.
