

# HoméoFrance press release

**"Ensure access to all patients, from a reimbursed homeopathy prescribed by qualified health professionals"**

Joel Siccardi President of Homeopath, France

**Responsible and sustainable homeopathic stakeholders come together within the association "HoméoFrance"**

Because millions of patients claim the choice to be able to treat themselves differently and safely, the stakeholders of homeopathy, gathered in collective for more than 18 months have decided to unite within HoméoFrance, an association that will be a platform of actions and proposals.

The stakeholders of Homeopathy France are committed to the recognition of the patient's expertise, and the guarantee of his freedom of choice as well as for the freedom of prescription of homeopathic medicines by health professionals.

HoméoFrance will also mobilise for the development of validated university education and research in homeopathy. The information of the general public and access for all to homeopathic therapeutics will also be part of the missions of this association.

All this should naturally lead to the maintenance of the status of the homeopathic drug and its reimbursement.

This is the roadmap that HoméoFrance is giving itself today!

5 colleges bringing together patients, teachers, health professionals, research and drug companies will work on actions and proposals in accordance with the purpose of the association. This structure will also respond to the many unwarranted attacks that are constantly flourishing against homeopathy by spreading many untruths.

## **The founding members of this association:**

- Association Homeopath Patients France - AHP France
- Homeopathic Centre of France - CHF - St. James Hospital Association
